## **Adaptive Snowboard Level 2 Exam Outline PSIA-RM-AASI Adaptive Snowboard 2018-19**

This is a three-day exam where each day can be taken on its own or all three can be taken together, however, all three days are required to achieve Adaptive Snowboard Level 2. Any individual modules taken and passed prior to the 2018-19 season will be honored and will not be required for the exam.

Prerequisites: PSIA/AASI Membership, ASB Level 1 Certification, Completion of ASB Cert 2 Exam Prep Clinic

### **Day 1 ASB Sit-Down**

This day requires proficiency at teaching and guiding students from Level 1-5 with physical disabilities best suited for riding with sit-down equipment. AASI/ATS teaching and technical concepts as they apply to each specialty and specific equipment, disability-specific knowledge, riding, safety, adaptive assists, medical and equipment assessment of adaptive riders. Candidates will also be expected to ride at a minimum of Snowboard Level 6 in a manner which provides the highest level of safety to both the candidate and the students whom he or she teaches and perform specific riding tasks designed to demonstrate proficiency in guiding sit-down students.

The safety portion of this exam must be passed to successfully complete this exam. If any safety portion is failed the participant needs to retake the entire exam day. For more information and certification materials please visit [www.psia-rm.org](http://www.psia-rm.org) adaptive site. **Candidates must make arrangements to bring adaptive equipment to this exam.**

### **Day 2 ASB Cog/VI/HOH**

This day requires proficiency teaching and guiding students from Level 1-5 with these particular adaptive specialties: cognitive or developmental impairment, visually impaired and hard of hearing related disabilities or a combination of any or all. AASI/ATS teaching and technical concepts as they apply to each specialty. Disability-specific knowledge, riding, safety, adaptive assists, medical and equipment assessments of adaptive riders. Candidates will also be expected to ride at a minimum of Snowboard Level 6 in a manner which provides the highest level of safety to both the candidate and the students whom he or she teaches and perform specific riding tasks designed to demonstrate proficiency in guiding students with the aforementioned disabilities.
