

## LEVEL 1 ASSESSMENT OVERVIEW

### Introduction

---

This document outlines the Daily Schedule, details about Assessment Groups, Learning Outcomes, and Assessment Activities for the PSIA-AASI RM Level 1 Certification.

Level 1 is the first level of PSIA-AASI certification. Candidates are evaluated through a series of tasks that showcase their ability to blend Technical, Teaching, and People Skills Fundamentals. Candidates should have experience teaching at the beginner level and show an introductory level of knowledge of instruction concepts. Successful candidates will apply tactics and fundamentals in tasks, interviews, and scenarios to show their experience teaching and demonstrating for students in beginner and easier intermediate terrain.

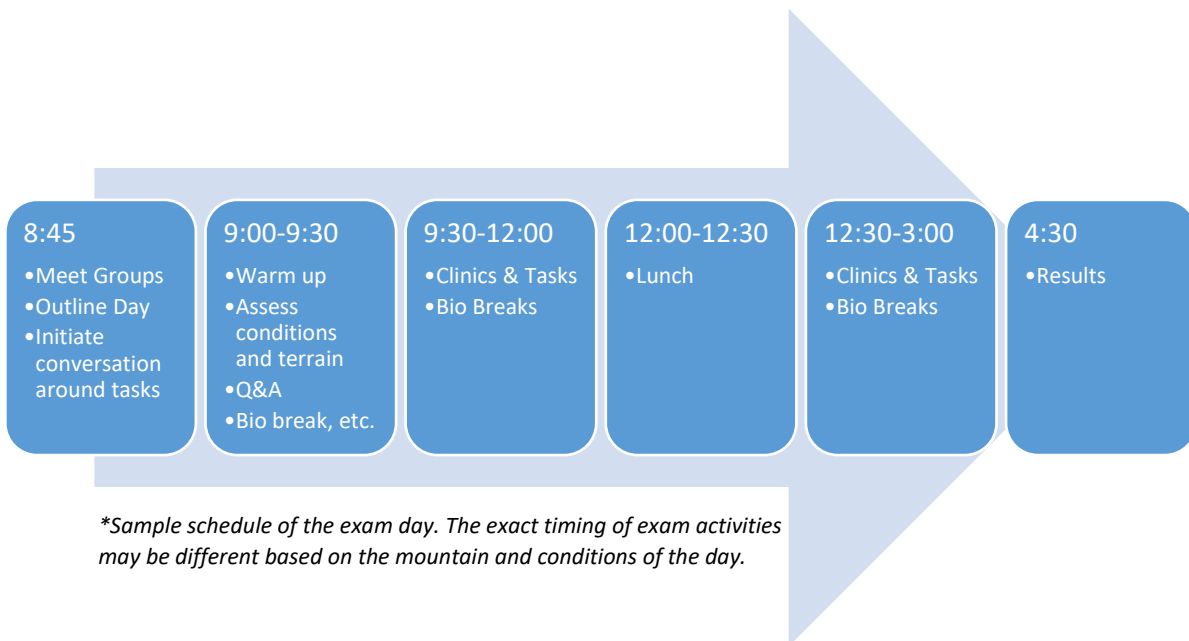

### Assessment Groups

---

- Each group will have a maximum of nine Candidates and one Examiner.
- When possible, a second examiner may observe a portion of the ski/ride day.

### Schedule of Activities

---

## Learning Outcomes & Assessment Criteria

---

The PSIA-AASI National Standards establish the Learning Outcomes and Assessment Criteria for Level 1 Certification. The Learning Outcomes for each day of the assessment are listed below with the Assessment Activities for that day. Refer to the Performance Guide for the Assessment Criteria and Indicators of Success related to each Learning Outcome.

Professionalism and Self-Management elements are assessed each day of the Level 1, from the beginning of the day at check-in to the end of the day when results are announced. Follow-up questions and interviews with Examiners, and observed interactions with other candidates, resort employees, and resort guests are all taken into consideration.

### Skiing/Riding Performance Module

---

#### Learning Outcomes

##### Alpine

- Skiing Performance: Adjusts and adapts the Alpine Skiing Fundamentals to demonstrate specific outcomes in beginner and easier intermediate terrain.

#### Assessment Activities

##### Skiing/Riding Performance

Candidates are evaluated on skiing/riding ability and their ability to give demos at the beginner level. Candidates' skiing or riding is evaluated through a series of tasks that showcase candidates' ability to blend the fundamentals. Successful candidates will apply tactics and fundamentals in highlighted, blended and applied tasks to show their experience demonstrating for students in beginner and some intermediate. Candidates will display appropriate safety awareness skiing in a group.

Examiners meet the groups on snow and lead Candidates through tasks selected from the Level 1 task pools. *Possible tasks can be found in the RM Alpine IDP / Snowboard Task List.*

Tasks may be set in all types of beginner and some intermediate terrain and conditions, including groomed terrain, bumps, crud, trees, and powder. Snowboard tasks can include small features in the terrain park.

Examiners will provide specific descriptions and demonstrations of tasks. Examiners observe, assess, and provide feedback consistent with National and RM Divisional support materials. Variations in movements and mechanics may be requested at the discretion of the evaluator.

Candidates may be given the opportunity to freeski/freeride during the exam; this time is also part of the exam and can be used to demonstrate personal style and terrain preferences.

### Movement Analysis & Technical Understanding Module

---

#### Learning Outcomes

## Alpine

- **Movement Analysis:** Articulates an accurate cause-and-effect relationship between body and ski performance within any single skiing fundamental in a specific phase of the turn to offer a relevant prescription for change for skiers in the beginner/novice zone.
- **Technical Understanding:** Utilizes current PSIA alpine resources to describe elements of ideal performances using at least one of the alpine fundamentals

### Assessment Activities

- Candidates will review MA Concepts (OEP) and how to observe a beginner student, present an organized and detailed description, and determine Cause & Effect based on the beginner progression.
- Examiners will use and model a 4-step, fundamental-based progression to improve candidates' skiing/riding. Examiners will highlight specific movement analysis skills using tasks from beginner and intermediate zone to highlight MA and skiing fundamentals.
- Candidates will practice using phones to capture video and do movement analysis with replay.
- Examiners vary demonstrations to help candidates see a range of functionality and effectiveness and highlight efficient/effective vs. inefficient/ineffective movement patterns as they appear.
- Examiners video each candidate on easy green terrain. Candidates observe their video and/or the video of another candidate and describe the body and ski performance.
- Candidates will observe advanced beginners (Level 3-4) or another candidate/Examiner. Before observing, the candidate will choose a fundamental to highlight in their analysis.
- Candidates are expected to identify movements of a beginner, identify deficiencies, and relate them to the specific exercises within the level 1-4 progression to improve their skiing/riding.

## Teaching Module

---

### Learning Outcomes

#### Teaching Skills

- **Assess & Plan:** Plans learning outcomes and organizes progressive learning experiences relevant to beginner/novice students.
- **Implement:** Facilitates learning experiences that guide students toward the agreed-upon outcome and engages them in the process.
- **Reflect/Review:** Communicates performance changes that target the learning outcome to help students identify that a change has been made

#### People Skills

- **Communication:** Engages in meaningful verbal and non-verbal communication with the group as a whole.
- **Relationships with Others:** Identifies likely motivations and emotions of individuals and understands group dynamics.

## Assessment Activities

Teach day takes place primarily in the beginner learning area. The Examiner will first review teaching concepts introduced in the e-learning while warming up the group. Candidates will review how to meet and greet students, ask questions to develop a student profile, create a goal statement for the lesson, and select appropriate terrain. The examiner will provide a demo teach in the L1-4 progression.

Candidates will each take on the role of “Instructor” to give a 10-15 minute teaching presentation to the group of “Students”. The Instructor may choose the age of the student group.

- Prior to leading their teaching segment, the Instructor will step away from the group, and the Students will be given a basic group profile, including lesson level, interests/hobbies, and what they did in their last lesson.
- During their teaching segment, the Instructor will:
  - Introduce themselves and build rapport
  - Ask questions to learn the student profile from the group
  - Create a goal statement for the lesson
    - Describe current performance
    - Describe goal performance
    - Describe student's motivations and desired outcomes
  - Involve the group in some kind of warmup or game based on the group’s interests/hobbies
  - Match a relevant teaching segment from the beginner level 1-4 progression
  - Candidates are encouraged to ask questions, lead their students through an activity, analyze movement, make observations, and/or ask follow-up questions.
- The examiner will take five minutes to debrief the presentations and facilitate comments from the group.
