RMT Skiing Assessment Outline

Course Description

RMT Candidates will be assessed on their ability to ski up to the RMT level. The Assessment will evaluate candidate’s ability to:

- Adjust and adapt the Alpine Skiing Fundamentals at all speeds for various training needs including: inspiration, participant understanding, highlighting skill blends, highlighting tactical choices, and problem solving.

The Skiing Assessment Module focuses on using a candidate’s ability to ski to the RMT level. They will apply the fundamentals appropriately across tasks within the IDP, modify tasks and adapt to challenging conditions. An RMT can distinguish the skiing demonstration needs of the various certification levels and tailor their skiing to each certification level.

Professionalism and Self-Management at the Assessment

During each assessment module, candidates will be assessed on their professionalism and self-management skills as they participate in the event. While the Learning Outcomes and Assessment Criteria are the same for each module, candidates are required to earn a passing score on them for each module independent of the other modules. The assessment will evaluate candidate’s ability to:

- Strengthen the professional environment by adapting to situations and other group members on behalf of themselves and their resort.
