

## SB RMT MA & TECHNICAL UNDERSTANDING ASSESSMENT OVERVIEW

### Introduction

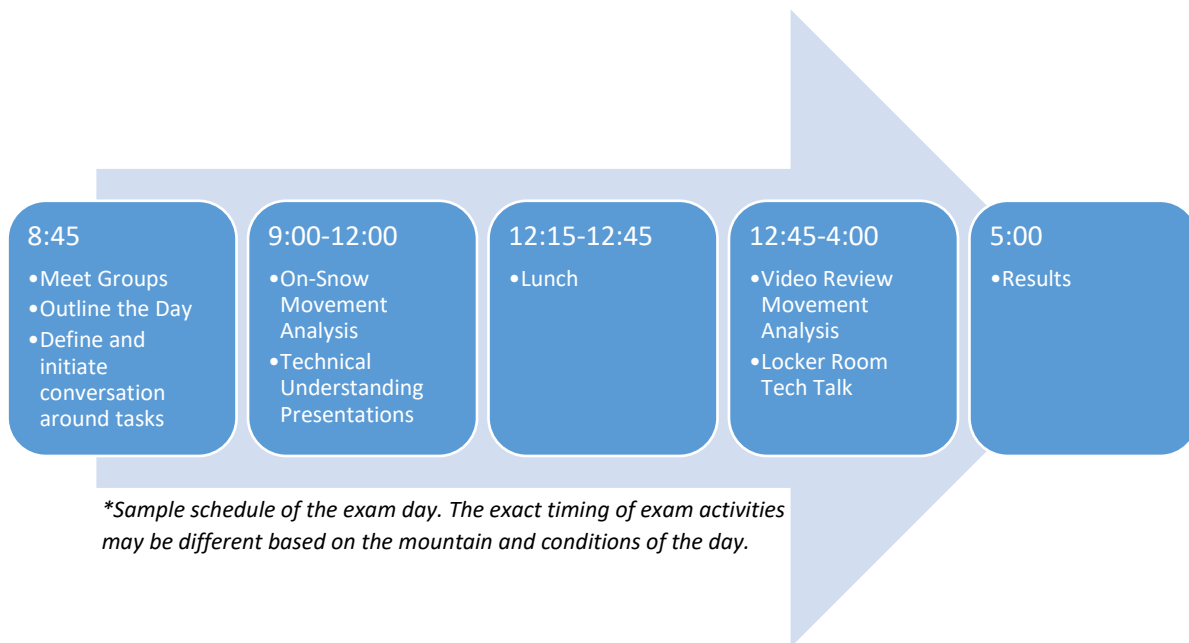

This document outlines the Daily Schedule, details about Assessment Groups, Learning Outcomes, and Assessment Activities for the Rocky Mountain Trainer MA & Technical Understanding Assessment.

Candidates will have opportunities to demonstrate Movement Analysis and Technical Understanding. These sessions will be on-snow or with video playback with different advanced/expert tasks and terrain. Candidates can expect to provide information and answer questions about movements and outcomes through the expert zone.

### Assessment Groups

- Each group will have a maximum of seven Candidates and two Examiners.
- Both Examiners will assess each Candidate during the day.

### Schedule of Activities

**ROCKY MOUNTAIN DIVISION**  
Professional Ski Instructors of America  
American Association of Snowboard Instructors

## Learning Outcomes & Assessment Criteria

---

PSIA-AASI Rocky Mountain Region establishes the Learning Outcomes and Assessment Criteria for the Rocky Mountain Trainer MA & Technical Understanding Assessment. During the RMT MA & Technical Understanding Assessment, Snowboard candidates are assessed on the following Learning Outcomes.

### **Movement Analysis**

- Articulates accurate cause-and-effect relationships of all the Technical Fundamentals within all phases of the turn/ATML to offer an effective prescription for change to prepare certification candidates and enhance clinic participant's riding.

### **Technical Understanding**

- Describe training performances throughout PSIA-AASI Certification using Technical Fundamentals and considering tactics and equipment choices using current PSIA-AASI resources.

### **Instructor Decisions & Behavior**

- Strengthens the professional environment by adapting to situations and other group members on behalf of themselves and their resort.

## Assessment Activities

---

### **Movement Analysis**

**On-Snow:** You will be asked to watch other candidates ride and discuss whether you thought they were successful with a task. Based on their performance you will build cause-and-effect relationships addressing the relationship between multiple fundamentals and develop a short prescription for change with exercises for the next run.

**Video Review:** You will lead a video review clinic using video of one of your peers filmed earlier in the day. Use the video to clearly illustrate where and how their movements were successful or unsuccessful. You will be expected to use the video to show stills or slow-motion to help illustrate your point.

### **Technical Understanding**

**Walk the Talk:** Each candidate will present a comparison of their personal riding performance to ideal performance on terrain of their choice to their peer candidates. A blend of demonstrations and explanations are encouraged. Evaluators may ask follow-up questions for clarity.

**Locker Room Talk:** Each candidate will facilitate a 5-minute group “Tech Talk” discussion covering impromptu subjects. Candidates will have 5 minutes to prepare prior to facilitating their segment.

### **Professionalism & Self-Management**

Professionalism and Self-Management is assessed from the beginning of the day at check-in to the end of the day when results are announced. Follow-up questions and interviews with Evaluators, and observed interactions with other candidates, resort employees, and resort guests are all taken into consideration.
